

## **Counterbalance Forklift Training Sudbury**

Counterbalance Forklift Training Sudbury - Counterbalance Forklift Training courses are always in high demand. The Counterbalance forklift is a forklift which is designed together with a weight that counters the balance, evenly spreading the weight of the load across the arms of the forklift. Counterbalance forklifts are designed so the weight on the lift is counterbalanced by the weight behind the centre of gravity. The load is projected out from the front of the machine so it is visible to the operator of the forklift. This particular kind of forklift truck should just be utilized on stable, level ground or on a prepared surface.

Forklift drivers are required to receive training that will enable them to better know the proper or right way across the arms of the forklift. The trainee would learn to correctly lower and raise the load vertically and how to tilt the mast of the lift truck, moving the mast between 5 and 15 degrees both forwards and backwards. Trainees would learn the RTITB standards needed for operating the forklift safely. Trainees would also know the types of attachments for the arms of the forklift.

Kinds of Counterbalance Forklifts:

### **Walkie Pallet Trucks**

The counterbalance forklift referred to as the Walkie Pallet Truck is best suited for getting into areas which are both small and cramped. This particular lift is really maneuverable and capable of accessing almost any tight spot.

### **Walkie Stackers**

The Walkie Stacker is a different forklift that varies slightly from the Walkie Pallet truck when it comes to its lift height. This machine is designed to access tighter spaces and has extra lift capabilities for high stacking. None of the Walkie line of lifts can be ridden. The operator has to walk behind them.

### **Rider Pallet Trucks**

The Rider Pallet Truck is made so the operator can ride it. These riding lifts are great for dock loading and unloading.

### **Wave Work Assist Vehicle**

The Wave Work Assist Vehicle is a counterbalance forklift meant to reach great heights of as much as 17 feet.

### **Sit Down Counter Balanced Trucks**

The Sit-down Counterbalance Forklift is built in three-wheel and four-wheel forklift designs. These tough and durable trucks are made to be ridden.
