

## **Order Picker License Sudbury**

Order Picker License Sudbury - Order preparation operation or order picking as it is more normally known is a method used within warehouse operations and consists of workers called order pickers. The order picker's job is to collect and take articles in particular quantities in order to fulfill the client's orders before shipment. Order picking is an easy warehousing process. The efficiency in which this particular task is done could be directly connected to the productivity of a supply chain. Hence, order picking is one of the most controlled logistic processes. Order picking falls within the category of the warehouse management system.

There are some certain types of order picking. The main types consist of: wave picking method, pick to box method, piece picking or picker to part method, zone picking method and sorting systems method.

The pick to box method involves the order picker filling the box with the things from his or her station. The box then moves to the other picking stations until the client order is complete. In this particular process, there is no movement of the order picker personnel. In the wave picking method, the order pickers move about in order to collect the required products for some orders. The picker to part method or piece picking is similar where the order picker or pickers move to collect the stuff needed but for one order only.

In the sorting systems method, there is no movement of the order picking employees. Instead, the things are brought to her or him through an automated system like for instance automatic storage or a conveyor system. In the zone picking method, every order picker is assigned to one specific zone. They are responsible for only realizing order picking in this specified zone.
